

2020 Construction Referendum FAQ

New Middle School (NVMS) and Renovation for Centralized Services (Operations/Transportation)

Question: How will the construction of a new Northview Middle School at 91st & College, an Operations Center (old NVMS), and Transportation facilities be funded?

Answer: Approximately \$18.8 million from the 2016 referendum plus approximately \$53.4 million from the proposed 2020 referendum will fund the construction of the new Northview Middle School at 91st & College. Approximately \$18.8 million would be required from the May 2020 referendum to repurpose the old NVMS into an Operation Service Center and centralizing and renovating existing transportation facilities.

Funding from the 2016 Referendum combined with funding from the May 2020 referendum will be used to construct a new NVMS at 91st & College	Proposed 2020 Referendum funds will fund the transition of the old NVM into the Operations Center and Transportation facilities	Combined funds available for the three projects TOTAL
\$72,200,000	\$18,800,000	\$91,000,000

Question: Why can't the existing maintenance and warehouse building continue to be utilized?

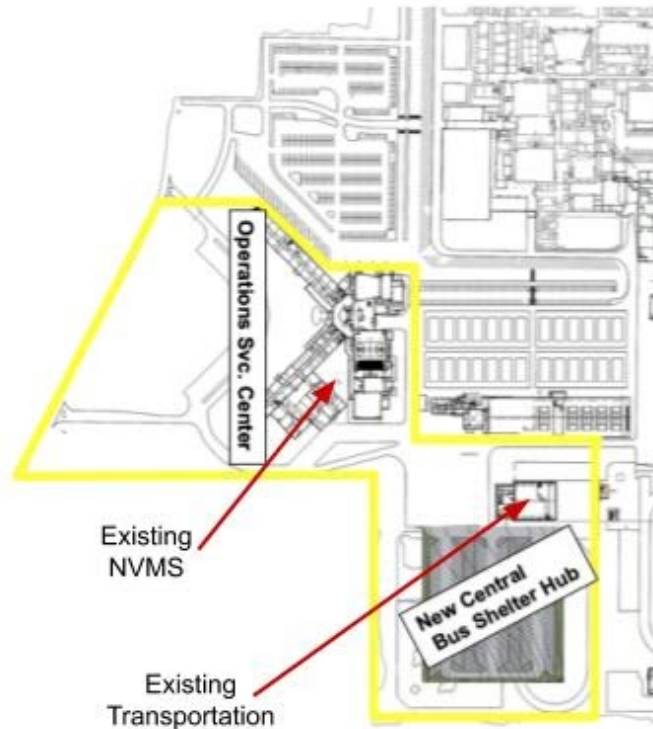

Answer: The existing maintenance and warehouse facility has passed its useful life expectancy and it would not be fiscally prudent to renovate. The district also has a need for additional warehousing/storage. Currently storage is spread across the school district in various facilities and should be consolidated for improved efficiencies. The existing maintenance/warehouse building will be removed. The space will then be utilized for needed site improvements on the high school campus..

Question: How will the existing Northview Middle School be repurposed?

Answer: The building will serve as the new centralized Operations Service Center housing the following: Maintenance Department, District Warehouse/Expanded District Storage, WT Police Department, Professional Development/Community Rooms, Staff Wellness Clinic, Alternative Ed Programs, NC Athletic Multi-Purpose Training Spaces and other possible centralized services.

Question: What will happen to the existing Transportation facility that currently is located on Central Campus?

Answer: The current transportation office, bus maintenance garage, and fuel island will remain in use at their current location. The bus storage currently located on Central Campus, Eastwood MS and Westlane MS will be centralized south of the current transportation facility in a new Bus Shelter Hub.

91st & College - DRAFT Plan 1/31/2020
